

8-Port Gigabit Ethernet Switch

Metal

Part No.: **530347**

Easy to install, with auto-learning capabilities.

The INTELLINET NETWORK SOLUTIONS Gigabit Ethernet Switch is perfect for the home or small office, delivering top speeds to the desktop to satisfy your demanding network needs.

High-Speed Performance

This desktop switch includes eight Gigabit Ethernet ports, providing you with high performance on your network to handle quick transfer speeds to support disk mirroring, data backup, graphics image file transfers and other bandwidth-intensive applications.

Auto Features

This network LAN switch includes many auto features that make it easy to use. No configuration is required, making installation Plug and Play and hassle free. And Auto-MDI/MDI-X crossover on all ports eliminates the need for any crossover cables. Each of the eight ports on this network LAN switch automatically senses the link speed of the connected network device and adjusts to 10, 100 or 1000 Mbps for compatibility and maximum performance.

Reliable Operation

The Gigabit Ethernet Switch supports flow control when operating in half duplex mode, and supports IEEE 802.3ab in full duplex mode, ensuring that your data transfer and network connectivity continue to run smoothly and uninterrupted. This, in conjunction with the broadcast storm control and the store and forward switching method, further ensure that your connections remain active even under extremely busy conditions.

Features:

- 10/100/1000 auto-sensing Auto MDI-X ports — automatically detect optimal network speeds
- High performance, half and full duplex, with zero packet loss
- Full flow control support provides optimum performance
