

Activity Tracker „FontFit 120 Pulse“

The FontaFit 120 Pulse Bluetooth Activity Tracker offers an at-a-glance overview of all your activities and more. In addition to standard functions such as the Heart rate monitoring, pedometer, distance measurement and calorie consumption, the FontaFit also records sleep data such as sleep duration and sleep cycles, has an alarm function, alerts the user when the armband is lost, and reminds the user to move regularly, if desired. Targets for activities can be set and monitored. Users are notified about incoming calls, messages received and other push notifications, both on the FontaFit display and by means of vibration alerts. Smartphone cameras can also be triggered by gestures and the display is activated by raising the arm. Android and iOS apps are available for the FontaFit which evaluate the recorded data and display it on a smartphone. The app can also record a running route. The iOS app also features Apple Health integration, thus always providing an up-to-date overview of your individual fitness and sleep levels. Thanks to a Bluetooth Smart connection, the FontaFit has a battery life of up to 5 days. The FontaFit records activity and sleep data for up to 7 days, even if it isn't connected to a smartphone. The durable silicone wristband protects the FontaFit from sweat and water splashes.

Features:

- Heart rate monitoring
- Pedometer
- Distance measurement
- Calorie consumption
- Date / time
- Sleep monitor
- Alarm
- Activity reminder
- Set daily goals
- Gesture function
- Notification function
- 7-day storage of activity and sleep data
- Firmware update
- App for Android 4.4 and higher, iOS 8 and higher

Technical specifications:

- Data transfer: Bluetooth 4.0 Low Energy
- Battery type: Lithium polymer
- Display: 0.49 inch OLED
- Sweat and water resistant
- Operating temperature: -10°C to +50°C
- Tracker weight: 26.5 g
- Armband length: 240 mm
- Armband material: Silicone
- Fastener material: Zinc-plated
- Display surround material: Chrome-plated plastic

Compatibility note:

Due to the large number of compatible devices, it is not possible to publish a complete list of compatible devices.

iOS smartphones from the iPhone 4S (released in 2011) onwards are compatible.

Android smartphones with Bluetooth 4.0 or later and Android 4.4 smartphones or later (initially models from 2014 onwards) are compatible.
